Projects

भोजन वितरण - Food Waste Management System

Developed a dynamic and user-friendly web application to facilitate food donations using a tech stack comprising HTML, CSS, JavaScript, PHP, and SQL. The platform aims to connect donors with surplus food to local charities and organizations, ensuring a streamlined and efficient process for food redistribution.

Algorithm Visualizer

This project is an interactive platform designed to make complex algorithms accessible and understandable through visual representations. Users can explore various sorting and pathfinding algorithms, gaining insights into their inner workings in real-time.

Personal Portfolio

I embarked on this project to create an online space that encapsulates my professional journey, skills, and achievements. This website serves as a dynamic showcase of my work, offering visitors a glimpse into my expertise and passion.

Extracurricular

Organized a Tech Quiz Competition named '[Cyber Sapiens](#)' during college tech fest. Demonstrated leadership and organizational skills in coordinating the event, ensuring smooth execution, and fostering a competitive yet engaging environment for participants.
